

Master Gardener | Forsyth County

Extension Master GardenerSM Volunteers (EMGVs) are members of the local community who assist Extension with its horticulture programs. EMGVs assist in teaching other community members, answering questions, and maintaining public gardens.

N.C. Cooperative Extension staff trains Extension Master Gardener Volunteers. EMGV training covers a variety of topics, including growing fruits, vegetables, flowers, trees, lawns, and more. In return for specialized training, EMGVs dedicate volunteer hours each year to expand Extension's capacity to educate other gardeners.
